Enhance Your Face

When it comes to enhancing your face with plastic surgery, trust and expertise are everything. You'll find both with Dr. Benjamin Bassichis, a double board certified Facial Plastic Surgeon. Dr. Bassichis' practice is unique in that he focuses exclusively on the face, head and neck; from skin care, cosmetic injectables and skin cancer reconstruction to aesthetic facial surgery and post-operative care. His holistic approach to facial rejuvenations, including facelifts, rhinoplasties, and eyelid surgeries, promotes natural results that allow his patients' own beauty to shine without appearing "done" or artificial. In addition to surgery, Dr. Bassichis' comprehensive Facial Health Maintenance Program™ advocates a life-long commitment to customized skin health and facial rejuvenation.

• What exciting advances are on the horizon in your field?

There has been an evolution in the treatment of facial aging. Older 'subtractive' facial surgeries have given way to modern 'restorative' techniques which evoke more beautiful, natural-looking results.

• What are some health/beauty words of wisdom you would tell everyone out there?

Truly great skin means more than simply a radiant complexion--it also means preventing skin cancer. So be healthy and use good skin care, especially sunscreen.
