

Dallas Facial Plastic Surgeon instructs Advanced Botox® Techniques Course for Dallas-Fort Worth area Botox® providers.

Dr. Benjamin Bassichis, a Dallas Facial Plastic Surgeon, recently presented his Advanced Botox Techniques to area Botox® providers at a conference held June 25th at Hotel ZaZa in Dallas.

(PRWeb via [PRWeb](#)) August 19, 2004 -- Allergan, the manufacturer of Botox® Cosmetic, sponsored Dr. Benjamin Bassichis, to instruct area Botox® providers on his Advanced Techniques for injecting Botox® Cosmetic. The event, held at the chic Hotel ZaZa, was very well attended, with over 40 area physicians and nurse injectors in attendance. The goal of the event was to help attain maximum results with Botox®, using proven techniques. During his introduction, Dr. Bassichis was described as being an "expert in the art and science of Botox® injections". As director of the Advanced Facial Plastic Surgery Center in Dallas, as well as a Clinical Assistant Professor at the University of Texas-Southwestern Medical Center, Dr. Bassichis was very qualified to be given the distinct honor to teach others his techniques.

Dr. Bassichis has published articles on his Botox® techniques in respected medical journals dedicated to the advancement of Facial Plastic Surgery. The reason behind his motivation to teach others, comes from his belief in the Botox® product and its effectiveness. "A patient who does not get the end result they desire, should not immediately blame the Botox®", states Dr. Bassichis. He goes on to say that, "There are differences in who is injecting, which is why it is crucial that you go to a well trained and well qualified clinician for your Botox® treatments."

Dr. Bassichis spends a lot of time with first time Botox® patients, dispelling myths and other untrue impressions about the treatment. A patient with no expression in their face is not someone who he considers having a good Botox® result. Improving the appearance of wrinkles, smoothing areas of concern, providing a more relaxed and refreshed look, and preventing an increase in wrinkles are the top reasons to have Botox® injections performed. According to Dr. Bassichis, the Advanced Techniques start with patient education, which corresponds to patient satisfaction following the injections.

Other uses for Botox® include a non-surgical browlift, treatments for excessive sweating, and headaches. To find out more about the many uses for Botox® Cosmetic and Dr. Benjamin Bassichis, please contact the Advanced Facial Plastic Surgery Center in Dallas.
