

Before and After your Surgical Treatments

At the Advanced Facial Plastic Surgery Center we do not believe that cosmetic surgery should be a single quick fix procedure.

On the contrary we believe that cosmetic surgery can be nidus of wellness and rejuvenation in our patients' lives. We aspire to inspire our patients to dedicate themselves to facial health before, during, and ever after their procedure.

Pre-operative Care

During the pre-operative phase our patients are encouraged to prepare their bodies for surgery by aiding their relaxation and optimal healing health with a variety of skin and recovery enhancing treatments best suited to their particular chosen procedure or procedures.

These treatments will not only help to minimize the mental stress of surgery but will also help to promote a relaxed and healthy physical state, highly beneficial to a faster rate of post-operative recovery.

Post-operative Care

After your procedure, we will encourage and support you to maintain the quality of your surgical results with our holistic Facial Health Maintenance Program™. With treatments and wellness customized for you, we can preserve and optimize our patients wonderful rejuvenated appearance and at the same time promote a healthy lifestyle.
